

LinkIt!

Welcome to LinkIt!

LinkIt! offers four core product and services and gives you more with every click of the mouse!

- Assessment Development and Scoring
- Detailed Diagnostic Reports
- Library of Downloadable Mini-lessons
- Professional Development & Consultation

Here are just a few of the ways that LinkIt! gives you more...

MORE RELEVANT TESTS

LinkIt! test items reflect the format, content, and difficulty of high-stakes tests, so there are no surprises when it's time to take the state test.

MORE CUSTOMIZATION

LinkIt! Can...

- Work with you to create customized formative assessments
- Upload existing district-created tests for easy scoring
- Create custom software features and reports upon request

MORE FLEXIBILITY

Students can take LinkIt! assessments on computer or with scanner-graded bubble sheets. Our plain paper scanning solution allows you to print customized bubble sheets from any computer without expensive hardware and score the results automatically.

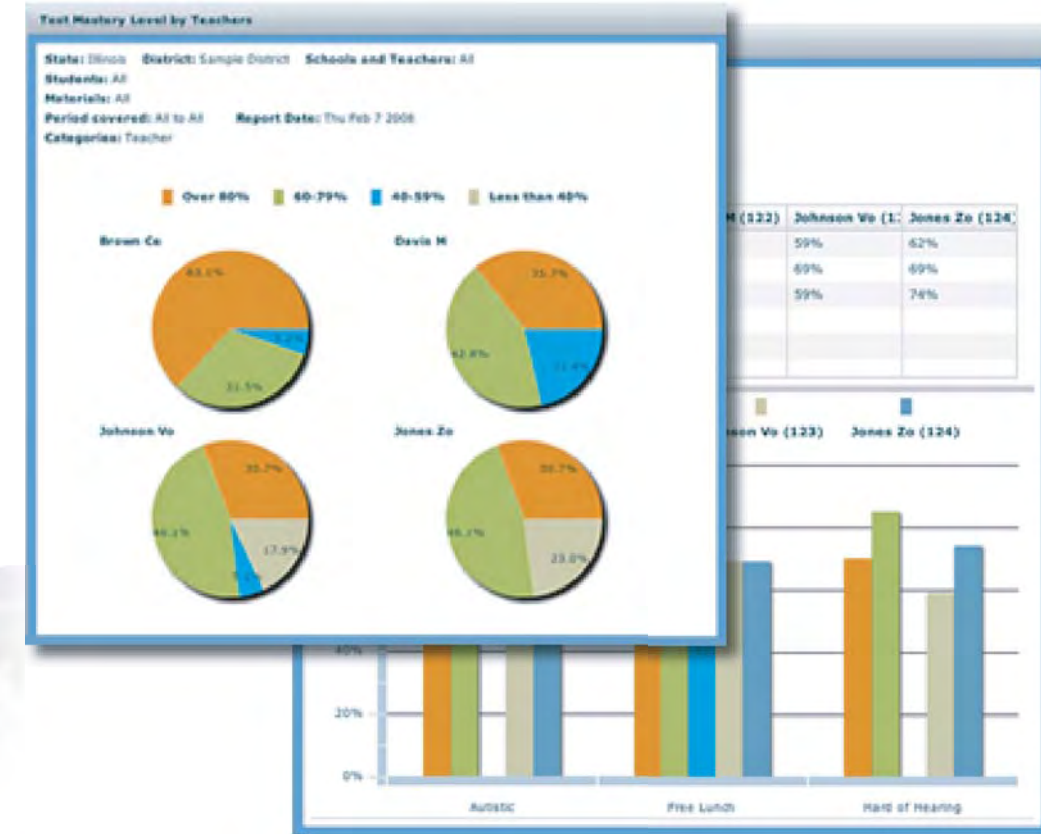

MORE INTUITIVE DESIGN

LinkIt!'s "What you see is what you get design" allows even computer novices to easily navigate the software to assign tests, print bubble sheets, create reports, and even download lessons!

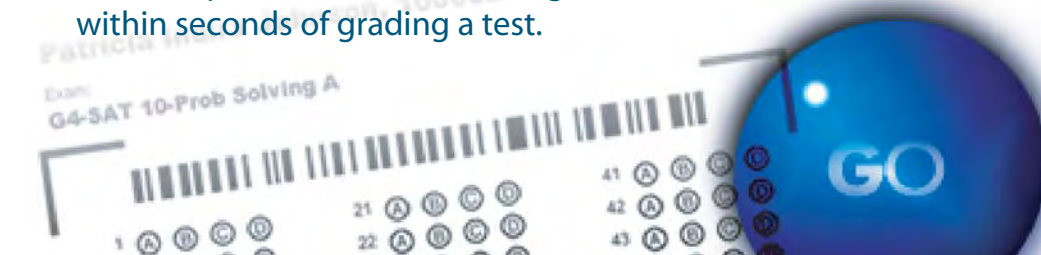

MORE REPORTS

Choose from several report styles with an easy to use web-based interface that takes just seconds to learn. Report types range from individual student learning plans to district-level skill mastery reports that can be fully disaggregated by race, gender, and special program.

MORE SPEED

With LinkIt! there is no more waiting! Get detailed reports on student performance for a single classroom or district-wide within seconds of grading a test.

MORE DETAIL

LinkIt! diagnostic reports pack extensive information into a single, "clickable" screen that automatically groups students by specific skill to facilitate differentiated instruction!

Number correct out of total number of times presented	Percent correct out of total number of times presented	Click for students who missed this area Double-click for more detail in this area	All questions in this area

Parks 43%, Simpson 29%, Smith 29%, Stephens 0%, Turner 29%, Lentkey 57%, Willard 57%

MORE PRACTICE

LinkIt!'s lesson library consists of hundreds of skills-based mini-lessons designed to reinforce key concepts. Typically used as supplement for existing textbook programs, LinkIt! lessons are available in downloadable pdf format or in pre-printed consumable workbooks.

Vocabulary: Using Context Clues

9 Cause and Effect

20 Main Idea

15 Multiplication Concepts

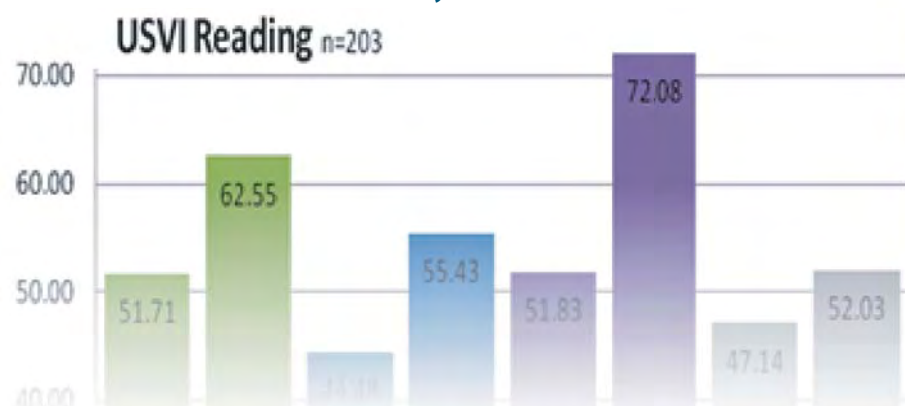

When the number of objects is the same in each group, you can multiply to find the total number in all the groups.

A If there are 6 boxes of juice in a pack, how many boxes are there in 3 packs?

You can show the amount by writing 3 groups of 6, or 3×6 .
You can say "3 times 6."
You can also show the amount with an array.

MORE RESEARCH

LinkIt! lessons are specifically designed for explicit, skills-based instruction and intervention. Built on the most recent research, LinkIt! lessons already have a proven track record of improving performance for thousands of students (and growing!). To participate in your own study of LinkIt! effectiveness, contact us today!

MORE EXPERIENCE

LinkIt! software is new to the market, but the LinkIt! content development team has created top-rated instructional programs for major educational publishers and school districts for the past 30 years.

MORE SUPPORT

Our long-term goal is to change the way teachers and administrators think about the use of data in the classroom. To accomplish this goal, we work with you and your team to create and execute an implementation strategy that makes sense and we stand by you every step of the way.
